

Agenda Item: 14-31 Request to Proceed to the EMC for Approval of Tar River Basin Hydrologic Models

Explanation: Session Law 2010-143 (G.S. §143.355(o)) requires that upon completion of a hydrologic model the Department will submit the model to the Environmental Management Commission for approval. Division of Water Resources staff have determined that the Tar models meet the requirements of G.S. §143.355(o). Public comments on the models were accepted from January 15 – March 17, 2014.

Recommendation: Based on public comment and staff certification of the models, the Division recommends that the Water Allocation Committee approve proceeding to the EMC for approval of the Tar River basin hydrologic models.
